Re Inga Council Meetings.

Inga Councilors do not hold a regular meeting this month, it seems. Councilor Tattersall, of No. 3 Division, made a fifty-mile round trip from Keep Hills on Friday last, the supposed date of the regular meeting.

The regular August meeting was postponed owing to the indisposition of someone connected with the municipality, and Mr. Tattersall claims he did not receive his notice of the change of meeting date to Aug. 17th until after this meeting was held.

It seems rather unfortunate for the ratepayers of No. 3 Division that their representative is not able to attend the Council meetings thru no fault of his own.

Mr. Hoadley's Hogs

Mr. Albrecht, a renter on the Sunnybrook Farm, was unfortunate last week in having his crop damaged last week to the extent of \$25 by hogs said to have come from the Government Demonstration Farm, nearby.

After the matter had been referred to the Department of Agriculture, and an opinion on the matter had been asked from the Department of the Attorney General, an amicable settlement was reached with Mr. Douglas, superintendent of Government Farms.

On Sports Day

A big sports day has been arranged for Wednesday next in connection with the Annual Fair. The usual good ball game can be looked for, and also a big football match between the Skinawaboose and the local team. Numerous other sporting events are on the program for the afternoon.

Entries for the Fair.

Some people would like to know why I am anxious to exhibit at the local Fair, so I'd like to tell them: A good many exhibitors keep their eye steadily on the prize money which they wish to earn, and unless they see have some chance of landing a prize they keep back quite good animals from their local Fair.

This is not the proper way to look at it. In doing anything, farmers as a rule think of it only as it affects themselves.

Farmers and stock raisers should want to let outsiders know that good stock can be found in this district, and the local Fair is the best means of letting them know this.

Those in this district who have good animals should not be backward at this time in having these entered for the Stony Plain Fair which opens on Tuesday next.

Stony Plain Town Council.

The Town Councilors met on Thursday night last for a short session, the passing of bills being the principal business. All but one of the bills were passed and ordered paid if found correct. A bill for \$9.35 for work done on the Fair Grounds, was laid over. It would be advisable for parties intending doing work for the Town to see they get their orders from the properly constituted authority. Doing this will facilitate the paying of their accounts.

A letter was received from the Minister of Health, intimating that an inspector will be sent to Stony within a short time.

LOCAL NEWS.

After a two years' stay in Portland, Ore., Mrs. Martin Ulmer has returned to Stony Plain.

Mr. and Mrs. Cavenagh left Monday for Sanguo.

Mr. Lundy made a business trip to Edmonton Monday.

Inspector Brooks motored down to Vermilion on Saturday.

Mr. and Mrs. W. Robertson have moved to their new residence near the Government Farm.

G. O. Gilmore, representing the C. N. Townsite Co., is in Stony this week, disposing of town lots.

Mesdames McDonald and Cavenagh motored to the City on Saturday.

Mr. Philip Alt has secured a position as junior in the local branch of the Bank of Montreal. The Accountant said they had to have another Philip to fill up.

Mr. Laird has been taking his law exams in Edmonton this week. On Monday he returned with the Driscoll Cup, the baseball trophy which he and his team mates had won.

Mr. Rossell has moved his gasoline pump to its old place in front of the store.

There was joy on Main St. the other day when a son and heir was born to our worthy townsman, Mr. Gus Zucht. Gus received the congratulations of a wide circle of friends, and reciprocated the greetings in a very pleasing manner indeed.

The Canadian National ball team has declined to play again in Stony.

The Women's Institute met yesterday at the home of Mrs. R. A. Walton.

The Stony ball team played a much closer game at Evansburg on Sunday than the scores in last week's paper showed—the figures being Stony 12, Evansburg 10.

Entries for the Fair close Saturday next, the 15th.

Business is improving so much on the Kellough Bus service that a trailer has been added.

Mr. Bill Ingle, superintendent of phones, has his staff of men busy this week, installing some new local services and renewing the poles in the Blueberry district which had been toppled over in the recent wind storm.

The only other important news this week are, Louie Graef has had a haircut and Mrs. Treit has sold her pigs.

World Insurance Against War

Nearly five years have passed since the signing of the Armistice put an end to actual hostilities in the Great War, to be followed the following year by the Peace Treaty and the creation of the League of Nations with its covenant designed to bring about the peaceable settlement of future disputes between nations. Yet the Allied armies are still in occupation of German soil and within the year the French and Belgian forces have penetrated further into Germany in an effort to compel recognition and payment of reparations.

Feeling between France and Germany is today possibly even more bitter than it was on the day the bugles sounded "march on." France, still fearful of future German aggression, is determined to further cripple her traditional enemy and thereby provide an adequate safeguard against any recurrence of the horrors and devastation through which she passed between August, 1914, and November, 1918. Germany continues sullen and refuses to pay, insisting upon financial inability to do so.

Russia remains a menace to the peace of the world, distracted by all nations and distrustful of all. Turkey defeated in the war, emerges triumphant from the peace conferences because of jealousies and conflicting interests among the nations allied in the war. Suspicions are rife among all the Balkan states, each one more or less fearful of the other, each seemingly awaiting an opportunity to wrest from the other territory which they covet or claim rightfully belongs to them.

The United States, whose representatives played a foremost part in bringing the League of Nations into existence and in framing its covenant, refuses to have anything to do with the stand alone in so-called splendid isolation from the entanglements which they fear would result from participation in the task of endeavoring to bring order out of the chaos in Europe. Meanwhile, economic ruin strikes country after country in the face, national currencies have lost their value, world trade is handicapped, resulting in millions of unemployed in Great Britain, the sanest of all the Big Powers of the world.

And now because the Italian members of a commission engaged in fixing an Albanian boundary line are assassinated, it is alleged by Greeks, the Italian Government serves an ultimatum on Greece, even before it is established that Greeks were responsible for the outrage, which is reminiscent of Austria's ultimatum to Serbia which precipitated the Great War, and because Greece does not immediately comply with all the terms of the Italian demands, Italy proceeds to bombard a Greek island and take possession of it, and, although a member of the League of Nations, practically repudiates her signature to the covenant and declares she will withdraw from the League if it seeks to interfere in the dispute which has arisen with Greece.

Of what value is Italy, or any country, as a member of the League if it remains free to make war on another member? And yet the League of Nations offers the only hope to the world that, just as soon as it feels strong enough to do so, some nation will not again plunge the world into the horrors of another Great War, and one which in its magnitude and slaughter would far surpass the one through which mankind has so recently emerged and which all but destroyed civilization itself.

Canadians sometimes ask themselves why they should be taxed to maintain the League of Nations, and why prominent British and Canadian statesmen should busy themselves travelling over the world lecturing on behalf of the League and encouraging the formation of branches of the League of Nations Society. But surely if one only stops to think a moment it will be realized that the League, imperfect though it may be, offers the only insurance against war, and if there is any insurance worth while it is protection against war.

Italy's attitude only serves to emphasize the importance of organizing public opinion the world over in support of the League. Public opinion makes and unmakes Governments, even where autocrats seem all powerful, and if the masses of the people in all countries, who are the chief sufferers in war, stand solidly back of the League, Governments will fall in line, with the result that the peace-loving League will become all powerful, and nations will be quick to comply with its requests and abide by its imperial decisions.

Even with the League as it is, without the League war would be not only probable, but almost a certainty in view of the present unsettled state of the world.

Has Many Honors

From 1911 to 1922 Saskatchewan farmers have won 229 prizes for their grain, grasses and vegetables at International shows held in Canada and the United States. Of these a total of 84 were either sweepstakes or first prizes. The exhibition of wheat has been a prominent feature at all the shows where it has been shown.

Loan Scheme For Cattle Feeding

A loan scheme for cattle feeding among the farmers that will enable the farmers to feed and hold cattle to meet market requirements, has been announced by the Manitoba Cattle Loan Company. It is hoped the result will show a considerable increase in livestock in the province, with better return for the farmer.

British Laws

Taft Pays a Tribute to the British Legal Principle

The close tie uniting American and Canadian legal systems, the bench and the bar, were emphasized at the final banquet of the American Bar Association at the St. Paul Auditorium, where Chief Justice Taft, the Earl of Birmingham, J. Hamilton Lewis and others spoke informally. The chief justiciate the association members on the planned visit to London next year.

"No worthy member of the American bar can visit London and the ancient laws and law courts and witness the administration of justice there, without feeling a deep gratitude to that country and nation from whom we derive our principles," said the chief justice.

"You will come back proud of the derivation of your law, and anxious to perpetuate and render stronger the bond we should feel for our old home of the law."

Bilious Headaches

Cold Night Sweats
You Quickly Subdue These Ailments By Using

DR. HAMILTON'S PILLS

By Regulating the System, They Bring Good Health

Of course the bowels are ordered and relaxed by Dr. Hamilton's Pills, the kidneys receive new tone, the blood is reinvigorated and the result is a renewal of good health.

No need for drugging. The sooner you use Dr. Hamilton's Pills the sooner you'll feel the brisk, keen satisfaction of a healthy, well-regulated system. Sold in yellow boxes, 25c.

Loaded Cattle in Record Time

What is claimed to be a world's record for loading cattle aboard a steamer was established at Quebec when 282 head of cattle were loaded aboard the Canadian Government Merchant Marine steamer, Canadian Victor, in 25 minutes.

The cattle walked up the gangway at the rate of over ten a minute, not a hitch marring the proceedings.

A FINE COMPLEXION

Can be Had Through Keeping the Blood Rich and Pure.

A girl's complexion is something more than a matter of vanity to be vainly. It is an indication of the state of her health. Pallor in a growing girl betokens a thinning of the blood. Eruptions mean impurities in the blood. Mothers should be watchful of their daughter's complexion and see to it that these signs are corrected—not covered up.

When a girl her teens becomes pale and sallow, especially if, at the same time, she shows an inclination to faint easily, listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements that Dr. Williams' Pink Pills can supply, but the physical signs are plain. The girl with a bad complexion, or who suffers from occasional headaches, who is easily tired and breathless after slight exertion, should begin taking Dr. Williams' Pink Pills at once. A good appetite, sparkling eyes and rosy cheeks follow the fair use of this medicine.

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

When a small boy refuses a second piece of pie it's a sign that there is something wrong with him—or the pie.

Minard's Liniment for Corns

When a young man is sowing his wild oats he always wishes that something would happen that would destroy the crop.

Railroad Man Gives Out Surprising Facts

"If any in my family were sick with stomach trouble or run-down condition, I would rather have one bottle of Tanlac than all the other medicines put together." Is the positive statement of W. A. Harrover, 8 Locomotive St., Hamilton, Ont., well-known farmhand for the Grand Trunk Railroad.

"My wife's health was restored by the Tanlac treatment in such short order it was astonishing, for she suffered so terribly with nervousness, headaches, sleeplessness and loss of appetite that I thought she would break down completely. She went meal after meal without eating, and

was so fearfully weak the care of our two children and the housework was more than she could do.

"After her first few doses of Tanlac my wife was like an entirely different person, and hasn't had a sick spell since she quit taking the medicine six months ago. Tanlac has certainly been a blessing in our house, and we are glad to recommend it."

Tanlac is for sale by all good druggists. Accept no substitutes. Over 37,000,000 bottles sold.

Tanlac Vegetable Pills are Nature's own remedy for constipation. For sale everywhere.

Heavy Demand For Binder Twine

Quantity Used in Saskatchewan Heaviest in History of the Province

With the sole exception of 1915 the sales of binder twine in Saskatchewan are the heaviest in the history of the province and far ahead of last year, according to dealers. One firm sold six million pounds. This firm estimated total consumption for the province this season at between 50,000,000 to 60,000,000 pounds. The price was down half a cent a pound from last year's figures, and the reduction over the past three years is seven cents a pound. The present average price is 13 1/2 cents.

Implement dealers also reported a heavier demand for binders than was noted in 1922, one of the best years in the history of the trade.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

Mine Production in B.C.

According to the prediction of the Hon. Wm. Sloan, Minister of Mines, the year 1923 will probably set a new high record in production for B.C. in 1922 the total output was \$35,155,345, making an increase of 25 per cent over the previous year. The rate of production, which was reached during the closing quarter of last year, has been continued so far this year. The total for the current year should run well over \$40,000,000, and may possibly near the \$50,000,000 mark.

Nights of Agony come in the train of a patient who cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate relief of J. D. Kellogg's Anshin Remedy. It banishes the frightful conditions, clears the passages, and enables the sufferer to go to sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

Interest Shown in Oil Fields

Recent developments of the oil fields of Southern Alberta have created great interest, and drilling now under way. It is hoped, will show definite results. Construction has started on the plant of the Standard Refining Company, which is expected to be completed by the end of this year, or early next spring.

Why suffer from corns when they can be painlessly routed out by using Holway's Corn Remover.

Air Force to Use Radio

tioned about the horse. As to the equipment is to be installed for Vancouver Unit.

Radio will be installed this winter to increase efficiency of the Vancouver unit, Royal Canadian Air Force, in the flying season of 1924. Major W. A. Steel, Ottawa, of the Royal Canadian Corps of Signals, who has gone to Dawson City to set up radio communication between the mining camps of the Yukon, announces wireless equipment will be installed at the Jericho Beach station and in the flying boats, which will enable the pilot of each seaplane to be in constant touch by speech with his base station.

This will be of great service to the Forest Patrol Branch of the Air Force in locating forest fires in unfrequented districts.

Minard's Liniment for Headaches

Has Altered Fashions

Bulgarian Women Shortened Dresses When Premier Died

The death of Stambulski, former premier of Bulgaria, seems to have had more than a political effect in his country. No sooner was it confirmed, says a Sofia news message, than the women in the cities began to order and make new dresses, and to buy new shoes with high heels.

This is all due to the fact that Stambulski had ordered that women's dresses should be worn long, and even described the exact length. He also ordered that all shoes should have flat heels, and the police were instructed to enforce these regulations.

Now the demand for dresses, and high heeled shoes in Sofia is so great that the shops cannot meet it.

Agricultural Workers

Fully one-half of the workers of the world are now engaged in agriculture. Department of Agriculture experts say. In India 72 per cent of the workers are in agricultural pursuits—71,000,000—males and 34,000,000 females.

Pain In the Muscles, Stiffness In Joints, Quickly Subdued By Nerville

Those who have tested out numerous liniments will agree that where something needed to relieve a deep-seated sore or rheumatic condition there is nothing so effective as Nerville. It penetrates so deeply, because of its chemical composition, that it reaches the ordinary oil preparation it has come to be known as the "muscle and joint" liniment. It works wonders in all cases of rheumatism, muscular and joint stiffness. It is a most potent liniment from your dealer to-day.

Had Aversion to Red Hair

Among all races, the ancient Egyptians probably had the strongest aversion to red-haired people. According to early authorities, they were in the habit of anointing their bodies with the ceremony of burning alive an unfortunate individual whose only crime was the color of his hair.

MRS. DAVIS NERVOUS WRECK

Tells Women How She Was Restored to Perfect Health by Lydia E. Pinkham's Vegetable Compound

Winnipeg, Man.—"I cannot speak too highly of what Lydia E. Pinkham's Vegetable Compound has done for me. I was a nervous wreck and I just had to force myself to do my work. Even the sound of my own children playing made me feel as if I must scream if they did not get away from me. I could not even go to sleep. My husband and I decided to take the Vegetable Compound and I started at once. I was able to do my work once more and it was a pleasure, not a burden. Now I have a fine bounding baby and am able to nurse her and enjoy doing my work. I cannot help recommending such a medicine, and any one seeing me before I took it, and seeing me now, can see what it does for me. I am only too pleased for you to use my testimonial. Mrs. Emily Davis, 724 McCrete Street, Winnipeg, Man."

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent free upon request. Write to the Lydia E. Pinkham Medicine Co., Colburn, Ont. This book contains valuable information.

Canada's Standard Smoke

TRADE MARK

Food Value Of Vegetables Lies Largely From The Fact That They Contain Vitamines

(By L. F. Burrows, Secretary, Canadian Horticultural Council)

Comparatively recent is the addition of the word "vitamin" to our vocabulary, and even though the use of the word is now common, its meaning is not yet understood. Physicians have long recognized the value of vegetables in the daily diet and we are now told that this value lies largely in the fact that they contain vitamins, and that vitamins are necessary to life. Some vegetables contain greater quantities and of different kinds than others. Three distinct kinds of vitamins have been named "A," "B," and "C."

Vitamin "A" is a mysterious element in food, without which children cannot grow, but which grows, folks also need. Shortage of vitamin "A" leads to disease of the eye, skin and kidneys; and may cause bad teeth, diarrhoea, pellagra and other ailments. As a rule, needs of all kinds are rather deficient in vitamin "A," although green peas contain appreciable amounts. Leafy plants, on the other hand, are valuable foods in this regard. Spinach and chard are probably the richest of the common leafy foods in this element. Lettuce, next, with cabbage holding third place.

The roots and tubers vary, sweet potatoes and carrots ranking first, while white or Irish potatoes contain but a small amount, and it is doubtful if beets, rutabagas and parsnips contain appreciable amounts. Tomatoes, however, are very rich in vitamin "A" and Hubbard squash is also a valuable source. Little work has been done on the fruits but there is evidence that apples, bananas and oranges contain small amounts of this vitamin.

Vitamin "B" is guardian of good digestion and proper functioning of the liver and other glands. This vitamin is found in the germ and branny portion of cereals. In the milling of wheat, however, this vitamin is so completely removed that the best grades of flour are entirely lacking. This does not mean that we should condemn the white breads, starchy foods, white rice, etc., it merely means that we must choose our foods intelligently and eat more vegetables.

Potatoes, sweet and white, contain appreciable amounts of vitamin "B," although the turnip and onion are more valuable in this regard. The beetroot contains a fair amount although its leaves appear to be much richer. This vitamin is also found in the tomato, cabbage, spinach, lettuce, parsley and the lowly dandelion, the tomato being especially valuable.

While many fruits have not been studied, it is probably safe to state that most fruit juices contain appreciable amounts of vitamin "B." It is likewise probable that nuts are valuable sources of this vitamin, inasmuch as all nuts that have been studied contain appreciable amounts.

Vitamin "C" prevents disease and promotes the general health. Lack of it gives the skin a bad color and makes the heart weak. It has long been known that lemons, limes, oranges and fresh fruits were curative in scurvy. It has only been in recent years that we have understood that this curative effect was due to vitamin "C." While oranges have been used for a number of years in the treatment of infantile scurvy, it is only recently that it has become the common practice to supply orange juice to infants as part of the regular feeding practice. More recently it has been discovered that tomato juice is practically equal to the juice of the orange in this regard, and many physicians in the poorer districts of the large cities are prescribing strained tomato juice in place of orange juice. The juice of canned tomatoes seems to be very satisfactory for this purpose, indicating that the canning process is not particularly destructive as far as vitamin "C" is concerned. Berries are known to have scurvy-curing properties, although little investigational work has been done.

The Swedish turnip or rutabaga is very valuable as a source of vitamin "C" and the same is true of the carrot. Young carrots are apparently more valuable than old carrots and this appears to be true for many vegetables. As a rule, it is probably safe

to state that the vitamin content of vegetables is highest at the time that the vegetable is most plump from the standpoint of tenderness and taste. Potatoes, onions and parsnips are also considered valuable antiscorbutic foods. Rhubarb, lettuce and cauliflower must also be included in the list, while levers of cabbage salad and "slaw" will be glad to know that raw cabbage is one of the best sources of vitamin "C" that we have. Tomatoes have the three kinds of vitamins necessary to human health. Most vegetables have one or two but seldom all three.

It is probably best to eat our fruits and vegetables in the fresh form when it is possible to do so. There is little, however, to be feared from the usual methods of canning and cooking. If we eat a sufficient amount of vegetables and fruits throughout the year, it will not matter if a small percentage of the vitamins are destroyed in the cooking process. As a rule, long continued heating or cooking is considered undesirable, and air should be excluded as far as possible.

It is not necessary that we be vegetarians. We should be reasonable and sensible and not fastidists. Every diet, especially that of growing children, should contain milk, butter, eggs, fresh vegetables and fresh fruits if we expect to obtain the best results. Various fruit and vegetable canning recipe books have been issued from time to time, but the best that has recently come to my attention is that issued by the Fruit Branch of the Dominion Department of Agriculture. These booklets contain recipes which have been thoroughly tested, are practical and economical. They may be had free upon application to the Fruit Commissioner, Department of Agriculture, Ottawa.

London's annual dish of meat is about 400,000 tons.

British Market Cattle Requirements Shipping Chilled Meat Not as Profitable as Livestock Shipments

An experiment in shipping chilled meat to Britain, conducted by the Federal Department of Agriculture, has led to the conclusion that, all things considered, it is more profitable to ship store cattle or fat cattle for immediate slaughter than to kill in Canada and ship the meat, chilled. Evidence seems to show that the most remunerative method is to ship such cattle as fit requirements, for sale as short-cut or long-kick stores; although well-finished cattle, uniform as to size, weight and finish, will find a good demand if shipped for immediate slaughter. Smooth-poled, well-bred steers weighing from a thousand to twelve hundred and fifty pounds, live weight, best fit the requirements for stores.

To Encourage Immigration

Would Have the Advantages of Canada Highlighted Abroad

Stressing the need of immigration to Canada at the present time, A. B. Lawton, of Winnipeg, in his presidential address delivered in Montreal, before the 17th annual convention of the Life Underwriters' Association of Canada, declared that it is now time for the advantages of Canada to be loudly heralded in those countries whose desirable immigrants may be attracted. He expressed gratification at the soundness of Canadian insurance institutions as compared with "financial misfortunes befalling other corporations," and pointed out that the aggregate insurance risk borne for Canadians today exceeded \$3,500,000,000.

Demand for Canadian Flour

Flour mills at Medicine Hat report continued activity in the foreign market for Canadian flour. The Lake of the Woods Milling Company have received an order for 43 tons of flour for China, while the Healey Shaw mill has received an order for 25 tons from the same source. The Maple Leaf Milling Company have booked space for 1,050 tons for export to China during August, September, October and November.

Early Exploration Work Of Sir Alexander Mackenzie In The Canadian Northwest

The life of Sir Alexander Mackenzie is a splendid example of dogged perseverance in the face of great difficulties, and as such is an incentive to young men of today to stick to their tasks until they win out. He started his career as a clerk in a counting house in Montreal. Sent out into the wilderness by the North West Fur Co. to trade with the Indians he displayed great courage and resource in battling with the elements. His reward was to be banished to Fort Chipewyan on Lake Athabasca. This was enough to discourage an ordinary man but Mackenzie emerged from the polar wilderness bearing a name that ranks with Cartier, La Salle, and other intrepid discoverers.

Away at his lonely post he dreamed of discovering a North West Passage, between the Atlantic and the Pacific. Flowing northwards he saw a mighty river, with a large tributary entering it from the far mountains of the west. To explore these rivers became his dominating ambition. Assuming all risks and costs of the expedition himself, he set out in June, 1789, on a voyage down the Athabasca River. Through fog, rain and wind the canoes were headed north for nine days until Slave Lake was reached. Here a camp of Dog Rib Indians were found, who sought to discourage Mackenzie's men from proceeding further by deliberately prophesying that they would die of old age before they reached the ocean, that impassable falls were ahead and that monstrous tribes lived on the banks who would seek to kill them. Mackenzie's Indian guide refused to go on, so he was boldly put into a canoe and forced ahead at the end of a paddle. One night, however, he gave his watchers the slip. Mackenzie was forced to stop at an encampment of strange Indians and, failing to persuade any to act as guide, he seized one savage and hoisted him into a big canoe, making signs that he was to pilot the way.

For forty days they thus pushed on northward and Mackenzie's companions feared that they would be trapped in the icy wilderness if they did not soon return. He asked them to go on for another seven days.

Next day they came upon a deserted Indian village and their spirits rose, for they thought that they were now near the sea. Carried on by the swift current at a rate of several miles a day they soon reached the mouth of the mighty river. Here, to their great delight, they saw a school of whales spouting. They knew then that their journey was at an end—they had reached the sea. Erecting a post on shore, Mackenzie engraved the date on it—July 14, 1789, with the names of all the party.

It had taken them six weeks to reach the Arctic. It took them eight to return for they had to battle against the current all the way. In many places the rapid current between shoals by a low line, this work being greatly impeded by the beaver meadows along the shore, in which the men sank waist deep. They reached Fort Chipewyan on Sept. 12, after a hundred and two days' absence.

Mackenzie had proved that there was no North West Passage, and he had also discovered the great river which bears his name.

His next endeavor was to explore the Peace River, and in May, 1792, he set out in a birch canoe thirty feet long, with Alexander Mackay as first assistant, six Canadian voyageurs and two Indian hunters.

The Peace River was a raging torrent, flooded by the spring thaw, and the crew had hard work in beating upstream. For a week they struggled on and then the mountains were reached. The difficulties of travel increased for the rapid rapids between precipices in a sheet of foaming foam. By means of an eighty-foot low line they pulled the canoe through the rapids, jumping from rock to rock or cutting foothold with axes in the face of the precipice.

The men rebelled at this kind of work and openly asserted that they wanted to go back. Mackenzie paid no heed to their murmurings but went ahead to view the gorge while they were packing up food. The prospect was not bright. As far as he could see stretched a succession of cataracts fifty feet wide walled in by great precipices. No canoe could possibly go up such a river. He sent Mackay ahead to see if there were any rapids extended and found that a portage of nine miles across the mountains was needed.

The canoe was pulled up the precipice by dint of herculean labors and the nine miles was painfully got over. When they launched the canoe on the river again they saw another range of mountains ahead of them. All that kept the men from turning back was the thought of that awful nine-mile portage.

Thus far there had been no sign of Indians, but as they proceeded upstream a number of savages suddenly appeared brandishing spears.

The men were panic-stricken but Mackenzie stepped boldly ashore and offered the Indians presents. They became friendly and told him they were nearing a portage across the Divide. Next day he came to the end of Peace River and discovered the source of the Fraser. He was the first white man to cross the Divide in the north.

Embarking on the Fraser, Mackenzie followed the river southward for a week. Meeting with more Indians he learned that there was a short way around to the salt water. The canoe was left on the river bank and the journey overland commenced. The going was hard over slippery rocks and was much obstructed by fallen trees. On the first day they only made twelve miles. Two weeks later they came across totem poles of cedar and Mackenzie surmised that they were those of the coast tribes. Their feet were cut and swollen, their boots worn out and their clothing torn to shreds and they were glad to embark on a stream in a native canoe. Past many Indian camps they went until at last they reached the blue sea—the sea that so many explorers had tried to reach but failed.

Barometers were invented in 1654.

SCIENCE OF A LIFETIME KICKED TO DEATH

A Nipigon trout full of "Pep"

The Nipigon River, which empties into Lake Superior 65 miles east of Port Arthur, has been called the "Aristocrat of Troutdom," because it is the world's greatest trout stream. In its 40-mile rush from Lake Nipigon to Lake Superior, it drops 550 feet and in the cold "white water" of its rapids and at the foot of its numerous falls, square-jawed, speckled brook trout grow to incredible size and give the angler the battle of a lifetime. Five and six-pound trout are common and the first one caught after the new bungalow camp built by the Canadian Pacific was opened on the Nipigon River, weighed six and one-half pounds. Last summer, W. C. Luebbert, editor of the Scientific Angler, caught one weighing six and three-quarter pounds

and four which together tipped the scales at ten pounds. Every day each member of his party of three caught ten pounds of trout, the legal limit of Ontario's fishing laws. Luebbert's big one, mounted by the Ontario Indian guides on a framed piece of white birch bark, was two feet long.

But, big as those trout were, the Nipigon has done even better. Several years ago, Dr. J. W. Cook, of the Williams, Ont., caught the world's record speckled trout in this stream while fishing with a live minnow. This "grand-daddy of them all" weighed fourteen and one-half pounds, more than two and a half feet long and eleven and one-half inches girth. One day Senator Frye, of Maine, told Prof. Louis Agassiz, the noted naturalist, that he had often caught

brook trout weighing four or five pounds. Agassiz replied that there were no real speckled trout of that size. Whereupon Frye caught a five-pounder and sent it to the professor.

"The science of a lifetime kicked to death by a dead fish," was Prof. Agassiz's humble reply.

Among the famous men who have caught big trout in the Nipigon were Theodore Roosevelt, James H. Rye, the Prince of Wales and Rev. Dr. Henry Van Dyke. Now that the new Canadian Pacific bungalow camp with its central clubhouse surrounded by rustic bungalows is at the service of fishermen and their families Nipigon promises to be more popular than ever.

Upper picture—Indians guides and their families attended the opening of the Nipigon River Bungalow Camp. Nipigon brook trout, world's record, 14½ lbs.

NOSE COLDS QUICKLY STOPPED

A neglected cold is the open doorway to Consumption. To quickly stop a cold, the best way is to clear the air-passages of the nose and throat, free them of germs, and let the healing vapor of CATARRHOZONE do the rest. One breath of CATARRHOZONE brings instant relief. Your suffering stops. Hoarseness is relieved, throat and nose are cleared, inflamed bronchial tubes are healed, all danger of Catarrh is prevented. Carry CATARRHOZONE Inhaler in your purse, in your vest pocket, and use it when the first shiver or sneeze comes. Complete outfit, One Dollar, small size 50c. At all drug stores. Refuse a substitute. By mail from The Catarrhozone Co., Montreal.

Author of "My Career," and Other Stories
Published by Special Arrangement with the Author

(Continued)

Outside of office hours I lived much as I had lived in my Collegiate days. Some of the girls I knew were teaching, two were training as nurses, a few more were in college. We played tennis and had dances in the summer, skated, went for long walks or snow-shoeed, and met at each other's houses in the winter. Of course we were not always just girls alone. But the boys were mostly ardent students or young fellows just beginning a business career, and their pleasures were naturally as simple—and economical—as our own. There were one or two semi-engagements in our circle, and the usual youthful tragedies and comedies, but as I look back it seems to me that until war broke out we were nothing more or less than happy, irresponsible, children. Of course we had our ambitions, and some of us have realized them. But far more than do the boys and girls who are growing up now, we seemed to feel that life was long and that the period of youth and learning need not be hurried.

Mother loved young people, especially young men, and she was the ideal chaperone. Nothing pleased her more than to think that I was popular socially, and I believe that at the bottom of her heart her greatest wish was to see me married. She feared for me the formalities in the commercial environment and what she called "the subtle danger of financial independence." Perhaps she had reason for her fears; Margaret was in the ascendant at that time, and Mother knew me too well to believe that I would ever be satisfied with half a life. She had been married when she was only twenty, "And I have never regretted it," she would tell me. "All my troubles and worries have been small compared with the happiness that you and your father brought me." It is all very fine to be independent when you are young, Margaret-Anne said, but a "lone woman" is the loneliest thing in creation, don't make any mistake about that.

CHAPTER TWO

It was rather a joke on Mother that when my first "precept" appeared on the scene she was in spite of her theories—not at all pleased, and I am afraid I paid her back for many a well-meant lecture. Whenever one of the boys showed signs of having acquired a temporary preference for her Margaret-Anne she would immediately adopt him. If he were the adoptable kind, and I used to tell her that the boys came to our house more to be mothered by her than because of me. They were dear boys, dearer now when so many of them lie in France,

but I could not see myself taking any of them seriously. I liked to skate with them, to dance with them, to preach to them when I thought they needed it, and, if necessary, to put any "outlaw" girl in her place. But that was all. Compared with the men I met during office hours they were painfully immature, they lacked the glamor and the assurance of success.

But to get back to the "precept," as I called him, to Mother's unrecanted horror. He was Benjamin Franklin Jones, Maudie Jones' uncle, the man who had so bewildered me when first I went to work. Mother and I had known him for years, for he lived with the Elbert Jones, but never intimately. He was always very nice to Maudie and me in a helpful sort of way—the kind of man who asks about your dolls when you are fifteen, and who does not know when to begin bringing chocolates by the box instead of in a bag. Maudie told me once that he had been engaged years ago to a girl who died of consumption, and that he had never looked at anyone else. I was living in the Middle Ages of Romance at the time and for about a week I made up stories about him. But except for the fact that he was prematurely grey he was not the stuff of which heroes are made. He was, well, not exactly fat, but undeniably well padded. His eyes were admittedly kind, but they were not thrilling. And he invariably wore what I have since learned to call a "fat man's collar," while his taste in ties was atrocious.

When I went into the office I discovered that "B.F." as he was called there, had another side. (It seems to have omitted to explain that I worked for a large and very solid Mortgage Company.) He was at the head of the Insurance Department, and was a veritable card-index of all that had gone on in the office for twenty years. He was, perhaps, not conspicuous for executive ability, but such was his grasp of details that in his department the routine work was carried on with the precision of a well-oiled machine. And we bided anyone whose ignorance or carelessness interfered with his schedule. In his own way he was indispensable, and he was one of the best-paid men in the service of the Company—generous too, he was, in a thoughtful, sensible way, not with the recklessness of youth.

B.F. and I had very little to do with each other in the office, and one thing I liked about him was that he was always careful to treat me exactly as he treated the other girls. I doubt if two people in the place knew that we were old friends. Outside of the office he was as he had always been, until some three years after it had occurred he half apologized for the time he had "called me down." The next morning he was as calmly impersonal as ever. But when a few Sundays later he walked home from church with Mother and me, and almost asked for an invitation to come in for a chat, I concluded that he had discovered Mother.

Maudie was delighted, and we almost quarrelled because I could not see that it would be a perfectly delightful thing for her uncle to marry my mother.

"He is good enough for anyone!" Maudie declared loyally. "He isn't really old, and you know that he is just as kind as he can be." "I suppose I was unnecessarily dense, but there was one reason for it. When B.F. came to the house he always talked to Mother more than to me, and he never asked me to go up with him alone. When we went to the theatre or to a concert Mother was always included in the invitation. And often I would come home in the evening, after having been out with one of the girls, to find him playing whist with Mother and the Robertsons, or propping comfortably over a cup of tea—she did not take coffee at night because it kept him awake.

Mother, naturally, was more worldly-wise than I. But as I avoided speaking of him to her, I had no means of discovering this; while she misunderstood my silence, and feared that I was losing my head, if not my heart. It was the first shadow that had come between us, the first matter that we had not discussed fully and freely, and I know it was a relief to us both when, after six months of this sort of thing, B.F. changed his tactics and gave us to understand that he was prepared to bedevil me on his heart, hand and bank account.

I shall however, always believe that it was really Mother whose companion-

ship he desired. He liked to see me playing around, no doubt, and I suppose it flattered him to be seen in public with a girl young enough to be his daughter—though he was really the least conceited of men—but he must have known that we had nothing in common, and that a girl could never really fall in love with a man who had glued on her doll's wings and helped her with her lessons.

I remember being very much puzzled at the time, by the remark of an amateur palmitist who said that I should prepossess mentally but of slow development otherwise. I know now what she meant. B.F. was alternately a joke and a nuisance. A joke when I could hold him over Mother's head and quote her advice to me on the subject of early marriages; a nuisance when I hopelessly allowed him to monopolize me, while the boys gazed in the dim distance and only occasionally came close enough to let drop some youthful sarcastic saying about Old chaps with money who could give a girl a good time. I did not want his good times, nor his candor, nor his improving books, but I couldn't very well ask the boys to take me to the rink or to a picture show, could I? And until B.F. asked me to marry him I could scarcely refuse his attentions without an awfully good excuse. In one way he used me very much as he had always done, and I thought it would have looked very silly to let him know that I noticed anything new.

I know I was a blinking idiot in these days. The palmitist was right, even yet I cannot convince me that B.F. cared for me in the same way that Murray did. I think it was just what in women we call the maternal instinct, running wild—or rather, forced into the conventional course by a man to whom a life out of place was the keenest of torture.

He took my refusal very nicely, hoped it would make no difference in our long friendship, and that Mother and I would always feel free to call on him at any time when a man could be of use to us. Rather surprisingly, he gave me to understand that he would not take my refusal as final. But he would not expect me to let him know if I changed my mind. That was too much to ask of any girl with fine feelings—he really had some awfully nice old-fashioned chivalrous ideas. So if I did not mind he would just ask me occasionally if I still stood upon him in the same way.

It was after this that Mother began to feel sorry for B.F., and I had to be very severe with her. Once Mother's sympathy was aroused she was absolutely irresponsible—almost to the point, I used to tell her, of giving away her last crust to her only daughter. But by this time she was quite sure of me, so I suppose she felt that she could afford to be generous.

The next year was a very quiet but

Fill your pipe with

very happy one. B.F. practically disposed of, I slipped back into my old circle. And, such as the inconsistency of human nature, I discovered that I was looked up to as one of wide experience. Even the boys who had dowered seemed to treat me with greater respect than had been their custom. We were very young. And Mother and I had never before been so close to each other. I thought at the time that when she made the most of every hour we were together, and talked to me as if I were her equal rather than her child, it was because she had feared that she might lose me. I believe now that she knew what was coming.

It was in the fall of 1913 that I met Murray Ayres. He had been sent from Head Office to take charge of our newly-formed Savings Bank Department, and when I came back from my holidays he had been in the office for ten days, quite long enough to

create a commotion in the susceptible hearts of the two junior stenographers. (To be continued)

Many Nations Are Rushing Assistance To Stricken Japan

London.—News of the earthquake reaching London from Japan continues sparse and conflicting, and it still is impossible to form any idea of the real extent of the disaster. It would seem that whatever sources of communication are available probably are being monopolized by the Japanese Government and the authorities for humanitarian purposes—securing the most effective aid in the terrible circumstances.

All the countries of Europe are vying to see which can offer the most unflinching assistance. They are raising funds, sending warships and arranging to provide food and other necessities for the stricken people. The columns of the British newspapers are much occupied with reports from commercial firms having relations with Japan concerning the safety of their representatives, but in these circles it is difficult to ascertain anything with certainty, and it is believed it will be a long time before the details of the catastrophe are fully known, for even the European Governments are finding it almost impossible to learn the fate of their own representatives.

The Central News reports that its Tokyo correspondent escaped from the capital Saturday and after many hardships arrived in Kobe with other refugees. He sends the following:

"Early estimates of the loss of life and damage to property will be found to be much too low. It is now known that the dead will number 200,000, with the financial loss as much as five billion yen (\$2,500,000,000)."

Although the Emperor and Empress and the regent accompanied by their lives, there has been a heavy death toll among the other members of the royal family. The Government is facing the situation with great gravity. Premier Yamamoto and Home Secretary Ito have taken upon themselves the work of distributing temporary relief at Tokyo, and are using 9,500,000 yen of the government reserve for that purpose. The cabinet ordered the mobilization of the navy, and the first and second squadrons received orders to rush food supplies to the stricken districts and to prepare to transport refugees.

"It is estimated that 500 foreigners are dead in Yokohama. The fate of the Belgian and German ambassadors is unknown, although it is rumored they are safe. Relief parties are now rushing to the scenes of the disaster, and order is being gradually restored. Rebuilding in Tokyo is expected to commence very shortly. The Government has ordered the whole selling of timber to be deferred to the devastated capital."

The British Government and people are doing everything possible to aid Japan. The foreign office announced that the admiral commanding the China squadron had been ordered to purchase foodstuffs and other supplies and to proceed forthwith with his fleet to Japan and place the supplies at the disposal of the Japanese Government.

In addition to the opening of a Mansion House fund, which the Lord Mayor of London always does if there is a public disaster, and which already is receiving contributions and support from ministers and public men, another body—the British Army—is taking active steps in the same direction.

Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother, Fletcher's Castoria has been in use for 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhoea; also, Puerperal Colic arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food, giving natural sleep without opiates.

Canadian Food For Japan

Food and Supplies Go to Japanese Relief Commission at Tokyo

Ottawa.—The dispatch of emergency food supplies on the Japanese of this class is merely preliminary to further assistance which will be granted to Japan, Premier King stated. He explained that he had asked Consul-General Ohta if he could indicate the kind of supplies which the Government of Japan would prefer Canada to give, but the latter, who has not yet received any communications from the Japanese capital, was unable to make specific requests. It was agreed, however, that food, especially that adapted to the use of those persons who might be injured and suffering as a result of the disaster, should be sent to the Japanese relief commission at Tokyo.

The Premier said the Government was also looking into the question of whether vessels of the Merchant Marine would be available in carrying supplies collected from Canadian ports to Japan.

Rockslide In B.C.

May Be Due to Earthquake Disturbances Sweeping Borders of Pacific Coast

Victoria, B.C.—Rockslides that killed two men in Nanaimo mines may have been due to earthquake disturbances which have been sweeping areas bordering on the Pacific Ocean during the last few days, and which caused the destruction of Japanese offices, it is believed by officials of the British Columbia Mine Department here. This belief is supported by records of Gonzales Helgish observatory here. Instruments at the observatory recorded earth tremors which indicated that large areas of land are settling down after the shocks that rocked them late last week. This settling movement, it is believed, may have caused the serious rockslide that occurred in Nanaimo.

Joins Wheat Pool

Members of Regina City Council Favor Participation

Regina.—The City Council, at their meeting Sept. 5, voted unanimously in favor of entering the Saskatchewan co-operative wheat pool, and marketing the city crop through the medium of the pool. The resolution was passed after G. F. Blair, city solicitor, had expressed an opinion that the city was not signing any contract that would prove detrimental to its interests. He added that the city, by renting its property, would automatically be released from the contract.

Practically all members of council spoke in favor of pool participation. The opinion was expressed that the city would materially assist in the organization of the pool through signing the contract and that, as Regina was dependent upon the agricultural success of this district, the city should turn over its crop to the pool.

Canada Utilizing

Empire Markets

Ottawa.—Declaring that Canada is taking advantage of Empire markets more fully than other countries are utilizing Canada's markets, a strong appeal, it is understood, will be made at the Imperial economic conference by her representatives, through an exhaustive memorandum, for more attention by Empire countries to the part this Dominion is able and prepared to play in the commercial commonwealth.

"A detailed analysis of Canada's present commercial position," the memorandum will show, "suggests that the most obvious need for Empire development, so far as Canada is concerned, either as a greater market for Empire products, or as a greater source of commodities for Empire consumption, is for other Empire countries to concentrate more effective selling power in Canada's markets."

Another Crop Prediction

Hon. W. R. Motherwell Would Not Be Surprised If It Reaches 400,000,000 Bushels

Toronto.—"If the frost keeps off another week, the winter will have the greatest crop in its history. Don't be surprised if it reaches 400,000,000 bushels. It will go a long way to putting the great part of Canada back on its feet."

This was the opinion expressed by Hon. W. R. Motherwell, Minister of Agriculture in the Federal Government.

Hon. Mr. Motherwell remarked that the meaning of so great a crop was almost beyond the imagination in its effect on the general welfare of the country.

Speaking of the crop in a more specific way, the minister said that Alberta this year was almost free from rust, and would perhaps exceed all its records in volume. Rust was damaging some other parts, particularly in Manitoba and also here and there in Saskatchewan, but despite this, the total result of the harvesting would be marvellous.

Speaking to 200 farmers, guests at the Canadian National Exhibition Directors' luncheon here, Mr. Motherwell said Canada had reason to be optimistic. "The note of gloom is no good," he said.

Mr. Motherwell rejoiced that Canada had no need of the United States as a wheat exporter, and if the frost did not touch this year's crop, the minister predicted it would mean that Canada would export one hundred million bushels more than its southern neighbor.

Sir Hugh Foynter, cousin of Premier Baldwin and Rydgerd Kilping, made an earnest plea for Canadians to forget party lines, if such was in order to lend the old hand their sympathy and support in the present world crisis.

Crossing Atlantic

In Frail Craft

French Seaman Trying to Win 900,000 Franc Bet

New York.—Eighty-four days out of Gibraltar alone in a battered 35-foot sloop in heavy seas about 200 miles off Nantucket light, F. Gerbault, a French seaman, refused a tow to port offered by the Greek liner, Byron, Capt. Vlahis related when the Byron arrived here.

After explaining that he was crossing the ocean on a bet of 500,000 francs and that two other schooners which had left Gibraltar with him had disappeared, Gerbault asked that his empty water keg and food bins be filled and went on his way.

Tracing Toronto Explorer

Stefansson Will Ask Siberian Government to Co-operate

Toronto.—Efforts are being made to secure the cooperation of the Siberian Government in ascertaining the fate of Alan Crawford, the Toronto boy, and his two companions, who started across the ice from Wrangel Island in January of this year, and have not been heard of since. John Anderson, Secretary of the Stefansson Arctic Expedition and Development Company, said that a cable had already been sent to Mr. Stefansson asking him to make the necessary arrangements.

League Is Warned Of Great Danger Threatening Europe

Elevator Tariff Not Changed

Grain Commissioners Refuse Application For Increased Rate

Winnipeg.—Applications of elevator owners for increases in the tariff of charges on grain have been refused by the Board of Grain Commissioners. It was announced by Chief Commissioner Leslie J. Boyd. Terminal elevator owners had made application for an increase of half-a-cent per 100 pounds for handling mixed grain, and country elevators asked the right to charge half-a-cent per bushel for cleaning wheat.

A minor change in the regulations permits terminal elevators to deliver screenings of an average quality as taken "from time to time as may be deemed necessary by the inspection department." Previous regulations provided for "the same quality of screenings as taken from the car, as shown by the grain inspector's test," and the owners declared it was impossible to comply with this provision.

R. D. Waugh Returns

Will Administer Manitoba Liquor Laws Impartially and Fearlessly

Winnipeg.—Winnipeg gave a royal welcome to ex-Mayor R. D. Waugh, who left four years ago to perform the duties of a member of the Star Valley Commission, appointed by the League of Nations, and who returns as chairman of the Manitoba Liquor Commission, a post which the Provincial Government asked him two months ago to accept.

He made the statement that his colleagues and he on the commission would administer the liquor act impartially, fearlessly and justly. Mr. Waugh spoke humorously of the situation.

"I did not bring a barrel back with me on the train, but I can assure it's on the road," he asserted, and he added, "you remember I left here as water commissioner, or chairman of the Greater Winnipeg water district; now I return to you as whisky commissioner, and the two should make an excellent combination, which should suit not only the dry people but the wet people. And I hope the administration of the act will be entirely successful."

U.S. War Craft Scrapped

Spectacular Show Is Staged By Airmen In Dropping Bombs

Cape Hatteras, N.C.—A spectacular show staged by United States army airmen over this famous graveyard of ships, marked the beginning of the scrapping of United States war craft, required under the naval limitation treaty.

The ships destroyed were once the proud Virginia and New Jersey which made up a part of the United States battle fleet.

It required just 20 minutes for the sinking of the Virginia, eight planes flying at an altitude of 3,000 feet accounting for her with thirteen 1,100 pound bombs. The New Jersey, after two attacks, was still afloat, but was listing badly to port as a result of the dropping of 60,000 pounds of bombs close beside her hull. Few direct hits were scored on her and her superstructure was only slightly damaged. A plane flying low sank her at the third attempt.

Geneva.—The superstructure of the League of Nations is imperilled, and, in the British view, the very foundations of present-day Europe are shaken. Such, briefly, is a summary of the situation at Geneva because of Italy's refusal to recognize the right of the League of Nations to intervene in her dispute with Greece.

Constitution and a deal of sadness prevails everywhere, as it is generally, though reluctantly admitted that the League has been unable to withstand the first great test of its practical use as machinery for regulation of differences between nations, as one of its leading members has declined to concede to its complicity. Hence, there is a growing sentiment among the smaller countries that if the League covenant applies to them, it does not bind the great powers of Europe.

All the more do they feel convinced of this because the proportions of the Italian and Greek conflict have taken are deemed by them to be justified by the original cause of the controversy, serious and regrettable as was the murder of the Italian officers.

But hope is not abandoned. Lord Robert Cecil's quietly voiced warning that if the Treaty of Versailles, which the covenant of the League is an integral part, was to be disregarded, the re-organization of Europe was endangered, has caused a profound impression, and has served to emphasize the gravity of the political crisis in which Europe is plunged. The council chamber was crowded with visitors, and Lord Robert's warning statement was received with vigorous handclapping.

"Once again," says a Swiss newspaper, "events demonstrate that we can impose peace only by war. So long as the League of Nations has no powerful army, it will only keep from fighting those who are incapable of employing with advantage the eternal arguments."

Without taking action, the council adjourned, order to permit the members to study the Italian statement. It is expected that another meeting will be held within a day or two.

B.C. Doukhobors Going to California
Nelson, B.C.—Shen Tolson, late Secretary, Treasurer of the Christian Community of Universal Brotherhood, heading a party of 16 Doukhobors from the colony near here, has left with his party for California to settle. The party consists of men, women and children.

Airplane For Forestry Patrol

Ottawa.—A Vickers-Viking air boat piloted by Major B. D. Hobbs, officer commanding the Winnipeg R.C.A.F. unit, left Ottawa recently for the west. It will proceed to Victoria Beach on Lake Winnipeg, there to engage in forestry patrol and survey work.

PRIZE LIST

OF THE Second Annual School Fair

TO BE HELD AT
Spruce Grove, Alberta,

Thursday, Sept. 13, 1923

Under the direction of the Department of Agriculture and Education, Edmonton, and the Spruce Grove School Fair Association.

Garden Products.

Prizes, 1st 75c, 2d 50c, 3d 40c.

Note—In Section 1 pupils compete with other pupils from the same school. In all remaining sections, competition is open to the pupils of all schools otherwise eligible.

- 1 Collection of Vegetables, to consist of any four of the following: Six each of Carrots, Beets, Parsnips; 3 each of Turnips and Mangels; 1 pint of shelled Peas and 2 heads of cabbage.
- 2 1 cck Potatoes.
- 3 Collection of Flowers of varieties distributed. Varieties should be exhibited in separate dishes.

Grains.

Note: Hand selected sheaf, 3 inches in diameter below heads; sun-flowers 8 inches in diameter.

- 4 Sheaf of Wheat.
- 5 Sheaf of Oats.
- 6 Sheaf of Barley.
- 7 Sheaf of Sunflowers.
- 8 One quart Threshed Wheat.
- 9 One quart Threshed Oats.
- 10 One quart Threshed Barley.

Cooking.

- (Ages 9 and under.)
- 11 Plain Cakes, with no icing.
- (Ages 10, 11, 12.)
- 12 Six Baking Powder Biscuits.

Canning.

- (Open to all ages.)
- 13 Cultivated Fruits, 1 jar Plums, 1 jar Peaches.
- 14 Vegetables—1 jar Peas, 1 jar Rhubarb.
- 15 Pickles—1 jar Pickled Onions, 1 jar Pickled Beets.

Cooking.

- (Ages 13 and over)
- 16 1 loaf White Bread.
- 17 1 loaf Colored Cookies.
- 18 Apple Pie (a double crust)

Sewing.

- Ages 11 and under, Slipover Apron.
- (Over 11) Hemmed Fairs on Cotton

Quebec, the Old World Province.

1. The Cabloche, a means of conveyance much favoured by visitors to Quebec.
2. An old brick oven, the like of which was used in France four centuries ago.
3. Chateau Frontenac, Quebec, the most majestic building on the continent, from a glorious height looks down on old Quebec and on the early battle fields.
4. Ancient and modern. The little cannon captured by the British at Bunker Hill, rests near the Quebec Citadel by the side of a howitzer which fell to the Canadians in the Great War.
5. Though their forms are modern, some farmers still use the ox or team of horses in the back country.

These are just a few pictures taken in Quebec. It is not without reason that this province is becoming the tourist resort of the continent, for here is a country of almost fascination and intrigue. Quebec has an atmosphere all its own, and if it can be said, more of an old-world atmosphere than has the old-world of today. Quebec is the eighteenth century looking back with the twentieth, yet retaining its identity.

One stops at little wayside villages. The wood-crozier, the patron saint in office, the nurtured forest, the woman at her distaff, the white-walled houses close at hand transport you to the distant land from whence the original settlers came. Yet, over there, beyond that little hedge or cedar fence the farmer gathers in his crop with up-to-date machinery, and stores it in a modern barn.

Behind the hum of the telegraph wire reminds you that you are not living in a by-gone day, and if that is not enough, through the not too dense woods, a huge train thunders.

Near the white walls the lady of the house draws water from the old-fashioned well, and takes her bread in an old brick oven, the like of which was used by her ancestors in France four centuries ago. She spins her own wool and shares with her husband a faith, which though not old-fashioned, is almost as old as the Christian era. A kindly hospitable soul is she, nor is she always backward in learning, for she probably attended the convent of the Ursulines at Quebec, or in a petite école at Louisville. And her husband—life may be comfortable to wear the homestead, to sit around the fire, or on the threshold at night, to smoke his "Rouge Quenai" and to drive five miles to church early on all holidays in his buggy or in the straw lined cart that is used about the farm, but he "knows his letters" and, better still, he knows how to farm.

The Quebec farm is usually up-to-date. Your "habitant" gets all that can be got from the soil, and if you sit with him and talk you will see that he gets the fullness of life too. Give him the simple pleasures. He is happy if he can re-tell the story of the big moose he shot by "La Saint Pierre" and the bear. He is some trapper too, "for sure I catch him lots of skin, me!"

The "old man," the "old woman" and that large, very large family, are content as seldom people are, and rightly so, for theirs is a rich heritage, and beautiful. The mighty St. Lawrence and its thousand tributaries, the glorious Laurentians, with their wooded slopes, the forests, lakes and myriad streams give them a country almost unexcelled for beauty. Game and fish abound as has been discovered by sportsmen from outside. Moose, trout, mackinnows, the big black bear, deer and caribou.

From a historical point of view Quebec is the hunting ground of the continent. Quebec city is one huge souvenir of the early days of Canadian settlement. Lost and re-captured several times her old walls still bear the marks of storm, and the old cannons still guard the city and the approaches to the citadel.

The history of Quebec is the history of Canada, priest, soldier and pioneer settler each having played a glorious part in the making of it. With the fair Dominion as a lasting memorial to their valor and courage, Quebec links them with the present day, their faith, piety, and the work they commenced are being preserved and carried on by the present generation. The relics of their day scattered here and there, and on almost every street look down or out upon the most modern improvements of the age, the railways, and the huge Canadian Pacific and other steamships at the docks, but lose not their identity, and in the case of buildings and public places, their charm and interest.

All through Quebec province, and in the most unexpected places one comes across historic links with the past. Like her people, Quebec is quiet, peaceful, and does not crave the limelight, but Quebec is not and cannot be overlooked. It is an old world, full of charm, within the new.

MAGIC BAKING POWDER

Magic Baking Powder is scientifically made and has never failed to give the maximum leavening efficiency. Because of this and the uniformly satisfactory results obtained by its use we recommend it as Canada's perfect baking powder.

PRODUCT OF CANADA

WORLD HAPPENINGS BRIEFLY TOLD

One of the most important gymnasiums in the world has been discovered by an Ontario prospector.

A grant of \$26,000 to the Salvation Army in aid of its Canadian enlisted work in Great Britain has been authorized.

At the end of June expenditure in connection with the British Empire Exhibition amounted to over \$6,000,000.

What is claimed to be a world's record for loading cattle aboard a steamer was established when 212 head of cattle were loaded aboard the Canadian Victor in 25 minutes.

Dancing at sea to wireless music broadcast from London is being enjoyed daily by passengers cruising from Brighton to Isle of Wight in the pleasure steamer Queen of the South.

The transference of the British admiralty staff from Dover to other dockyards, which is proceeding apace, marks the end of Dover as a naval base.

Participation of the United States in the permanent court of international justice at The Hague was endorsed by the American Bar Association at the closing of its annual convention at Minneapolis.

NORMAN E. TRIMPER

THIS MAN TELLS YOU HOW TO KEEP FIT!

Dear Sir, N. E.—My back was so bad I could hardly work. I was always tired and had no ambition; was nervous and dizzy, and everything seemed to worry me. I also had terrible pains in my right side. I felt badly for about eighteen months, and could not do any work as it should have been done. I tried several doctors, and also bought about \$20.00 worth of put up medicines, but I found no relief until I took Doctor Pierce's Golden Medical Discovery and Doctor Pierce's Anuric (anti-uric acid) Tablets. I have taken two bottles of the Discovery, and four of the Anuric Tablets, and can say that I feel as well as I have felt for the last two years. I advise any sufferer to give Dr. Pierce's remedies a fair trial. I cannot recommend them too highly for what they have done for me and shall be pleased to answer any one who comes to write me. —Norman E. Trimper, R. R. 1.

Obtain these famous medicines now at your nearest drug store, in tablets or liquid, or send 10 cents to Dr. Pierce's Laboratory in Bridgeport, Ont., for a trial package of any of his remedies. Write Doctor Pierce, President, Jewell Hotel in Buffalo, N. Y., if you desire free medical advice.

Cow-Testing Progress

Five Provinces Show Considerable Increase in Number of Herds Tested

There were 502 cow-testing centres, 2,680 dairy herds under test, and 26,203 tests conducted this year, mainly under the supervision of Dominion dairy officials, up to the end of June last. Five of the provinces show a considerable increase in the number of herds tested. Saskatchewan shows the largest percentage of increase, with New Brunswick next in line and Alberta a close third. The increase in Saskatchewan is largely due to the efficient work of provincial officials. In British Columbia, with five organizations co-operative associations, approximately two thousand cows are tested each month.

Creamery Butter Production

Production Last Year Excellent that of Any Previous Year

The total quantity of creamery butter made in Canada in 1922 was 762,774 pounds valued at \$21,530,739, an increase in quantity over the previous year of 19,984,164 pounds, or 14 per cent, and in value of \$3,395,543, or 7 per cent. The production of creamery butter last year exceeded that of any previous year.

The total quantity of cheese made in Canada last year was 136,573,473 pounds valued at \$22,067,106, compared with 162,117,494 pounds valued at \$28,710,020 in the previous year.

A GOOD MEDICINE FOR THE BABY

Nothing can equal Baby's Own Tablets as a medicine for little ones. They are a taxative and yet thorough in action, and never fail to relieve constipation, colic, colds and simple fevers. Once a mother knows them she will use nothing else. Concerning them Mrs. Saluste Pelletier, St. James des Annapolis, Que., writes: "I always keep a box of Baby's Own Tablets in the house. They are the best medicine I know of for little ones and I would not be without them." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Four:

Teacher (in dramatics).—"Imagine midnight, silent as the grave. Two burglar force open a library window and commences to crack the safe. The clock strikes one—"

Voice in rear—"Which one?"

Internally and Externally it is Good: The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints and externally. For sore throat, cough, whooping cough, pain in the chest, colic and many kindred ailments it has unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Britain Orders Latest Tanks

Self-Contained Fighting Unit Also Draws Artillery Into Action

British gun manufacturers have produced a new war weapon, says The Daily News. It takes the form of a tractor tank and is capable of drawing artillery into action in addition to being a self-contained fighting unit.

The tank is mounted with guns, has a turret and a special compartment in which it carries field artillery. Its range is twice that of the earlier tanks used in the war.

The British Government has planned an initial order for 25 of the new machines to cost \$10,000 each.

Nearly all children are subject to worms, and many are born with them. Beware them suffering by using Mother's Worm Expeller, an excellent remedy.

Electrical Apparatus Imported From States

Country Supplies Bulk of Material Used by Canada

Canada buys electrical apparatus almost entirely in the United States, according to a return giving the imports of articles of this nature in July, published by the Dominion Bureau of Statistics.

The total imports of electrical apparatus in that month were valued at \$1,212,315, and of this a value of \$1,079,896 came from the United States. The United Kingdom sent \$92,000 worth, while Japan, with a value of about \$9,000, came third.

Minard's Liniment Relieves Colds

CUTICURA HEALS LARGE PIMPLES

On Face, Itched and Burned, Caused Loss of Sleep.

"I was troubled awfully with pimples on my face. Little white spots formed at first which later broke out in large, red pimples that itched and burned. They itched and burned causing loss of sleep, and my face was disfigured."

"Other remedies were used without success. A friend recommended Cuticura Soap and Ointment so I purchased some, and while using them about a week I got relief. I continued using them and in a month was completely healed." (Signed) Miss Lillian Warner, Williamsburg, Ontario.

Daily use of Cuticura Soap, Ointment and Talcum helps to prevent skin troubles. Write for full particulars. Address: "Cuticura," Dept. 443 St. Paul, Minn., U.S.A. Sold everywhere. Cuticura Soap and Ointment 25c each.

Reasons For Queer Habits

Japanese Have Logical Explanation For Doing Things Backwards

"When I first went to Japan a long-time American resident of that country is reported in the 'Type Metal Magazine' as saying, 'they seemed to do everything the wrong way. They sawed wood by drawing the saw toward them. They backed their horses into the stalls. When our clocks are striking one, theirs would strike 11. Their blacksmiths worked sitting down and when they wanted to rest they stood up. But gradually I learned that there was a logical reason for each of these seemingly queer habits.'"

"Pulling the saw prevented bucking. 'When are you in a hurry—when you put your horse in the stall or when you take him out?' was the answer of the man who was questioned about the horses. As to the clock, it seems that the Japanese prefer to know how many hours are left in the day rather than how many have passed. And the blacksmith who sits down works with his feet as well as his hands; literally, he has four hands, and he rests all these when he gets up."

DIARRHOEA and VOMITING Doubled Up With Pains

If you are suddenly attacked with diarrhoea, dysentery, colic, cramps or pain in the stomach or any looseness of the bowels do not waste valuable time but at once procure a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

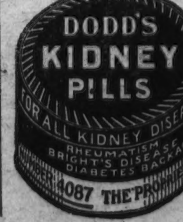

Mrs. Ernest Morris, 3 Webb St., London, Ont., writes: "I take great pleasure in recommending Dr. Fowler's Extract of Wild Strawberry for what it has done for me. Some time ago I took an awful violent headache, then started to vomit and felt so sick I could hardly stand it all day; towards evening intense pain came in my bowels and I was just doubled up the pains were so bad; the perspiration stood out like beads on my forehead; then the diarrhoea started and I really thought I was going to die."

My husband went to the drug store and got a bottle of Dr. Fowler's Extract of Wild Strawberry; he gave me four doses, at intervals, and by noon next day the diarrhoea had stopped and the pain was all gone too."

Now I will never be without 'Dr. Fowler's' in the house."

Price 50c a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

To be absolutely safe in the summer one has to stay off the street, out of the water, out of autos, trains and interurbans. How glorious our civilization is!—Ann Arbor Times-News.

Demand For Paper

On Ocean Liners Management Has Found It Necessary To Invest Faster Presses

Decline, according to the management, "the demand has been larger than could have been predicted," now and faster printing presses will shortly be installed on the Cunard liners to print the Daily Mail Atlantic Edition. This paper is set in type, edited and published each day that the liners are at sea. The ships, publishing the Daily Mail Atlantic Edition—are the Regentia, Aquitania, Mauritania, Carmania, Franconia, Thyetania, Leconia, Caronia, Samaria and Scythia. Installation of linotype machines on the first three ships listed above is the latest forward step in this new branch of journalism. Twice a day by arrangement with the Radio Communication Company, important news events are wirelessly to the ships on the Atlantic. The subscription price is one shilling and threepence per the page. Single copies are sold at threepence.

Manslaughter In 2nd Degree

Using a razor—bad stuff—but many people do it for their corns. The only remedy that is painless and sure is Putnam's Corn Extractor, which does remove warts and corns, cleans them right off. Refused a substitute for Putnam's, 25c everywhere.

Canada Foremost Wheat Grower

A cablegram received at Ottawa from the International Institute of Agriculture at Rome summarizing the world's wheat conditions places Canada in the foremost position as a source of supply for the world's wheat markets. The prospective shipments from principal wheat exporting countries are placed as follows: Canada, 266 million bushels; United States, 180 millions; Argentina, 120 millions; Australia, 40 millions; India, 30 millions; Russia, 20 millions; Balkans, 10 millions.

A Power of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and look to it as the most valuable liniment available. Its uses are innumerable and for many years it has been priced as the leading liniment for man and beast.

Beauties of Canada

New Posters Depicting Scenes of Great Beauty Issued by C.N. Railways

Combining the best work of artists and printers and setting forth the beauties of Canada in a manner which appeals instantly to the eye, a new series of posters is being issued by the Canadian National Railways and are now being placed on display in the offices of the system and elsewhere in the Dominion and in other countries. The grandeur of the Rockies, typified by Mount Robson, the highest peak in the Canadian Rockies, is depicted in an artistic design on one of the posters while another shows a magnificent view of Mount Edith Cavell and Lake Beauvert, all of which are on the lines of the National system.

The stunt of gun upon placid waters, with motor boats and other craft in the foreground and Minaki Inn in the background, carries to intending tourists a message of the beauties of that section of Ontario which lies just 114 miles west of Winnipeg.

The Great Lakes and Port Arthur are depicted in a poster showing the lake and rail route offered to tourists travelling between Eastern and Western Canada, a deck scene on the S.S. Noronic being the medium through which the poster tells its story of a pleasant journey which may be enjoyed as one sails down their inland seas.

In his poster design of the Lower St. Lawrence, the artist has triumphed and the prize has added the touch of his own art to the result. An aged inhabitant with his ox-cart full of fragrant hay has ascended a steep hill at the foot of which nestles a quaint old village which in Canada could be found only in Lower Quebec.

Protecting Elk Herds

The elk herds on Vancouver Island, north of Cowichan Lake, are to have a reservation of forty square miles, and the British Columbia Game Board is now engaged in making necessary improvements so that real protection may be afforded this rare species of big game. There are said to be about 300 head of elk in the immediate vicinity of North Cowichan Lake.

A Buttery Farm

Would Raise Insects in California for Color and Decorations

An application for permission to establish a butterfly farm on public domain in the Angeles Forest reserve has been made to Supervisor H. H. Charlton, Los Angeles, Cal., by John Hewlett, of Redlands, California.

Hewlett stated that if permission were granted to him to use forty acres for that purpose, he would plant the entire tract in flowers he believes butterflies like particularly, and would raise the insects for color and decorations.

"Golf," declares a physician, "is an office to business." Of course it is; the office always runs more smoothly when the boss takes an afternoon off.—Chicago Evening Post.

Stony Plain and District.

Mr. Mike Zucht this week shipped several more cars of loam to Jasper Lodge.

A large number of City sportsmen is expected to arrive in the district on next Saturday afternoon, after prize-chicken, which are said to be plentiful in the districts along the river.

Blueberry School opened on Monday last, with the two Miss Gaudesons as teachers in charge.

Buy your school supplies at J. F. Clarke's Drug Store.

A meeting of local threshmen was held at Royal Hotel Saturday evening, when the rates for the season were set at 5c oats, 6c barley, and 7c wheat. An effort was made to set wheat at 8c, but this failed.

John Kotscherofsky brought his steam outfit down from Junkins on Monday, and started threshing today.

Stock threshing commenced in this district this week. In the farther out districts the farmers are stacking their grain.

Mr. Fred Kreye has purchased a 1530 McCormick-Deering tractor and 2236 separator from Mr. Ducholke. These were taken out to Mr. Kreye's farm, tried out, and have given satisfaction.

Mr. Brunenstuh, who has been carrying the mail at Spruce Grove, has had his contract renewed for a further term.

Max Mecklenburg, eyesight specialist, will be at Royal Hotel on Saturday, October 6.

I can provide you with a Life Assurance Policy to suit your particular needs. R. B. Brooks, local agent for The Sun Life Assurance Co.

There is no open season for shooting partridge this year, north of the Battle River.

Game licenses may be had at The Sun office.

On Sunday Next

In the Methodist Church, on Sunday next, at 7.30 p.m., Mr. A. L. Marks, LL.B., solicitor to the Social Service council, will speak on the "Ballot for Nov. 5th." Ample opportunity will be given for questions. A hearty invitation is extended to everybody.

Mr. Marks will also speak in Holborn School House at 3.30 p.m.

Wheat Pool Incorporated.

Under the name of The Alberta Co-operative Wheat Producers Limited, the new Alberta Wheat Pool has been incorporated under the laws of the Province with respect to co-operative associations.

From 3000 to 4000 acres were signed up in Stony Plain district during the campaign just closed.

What the Pool is Blamed For

The wheat pool agitation is said to be having a deterrent effect on the construction of new grain elevators throughout the Province. The new building proposed by the Federal Grain Co. at Duffield is now in the doubtful list, although the railway has constructed the spur from the main line to the proposed site. The proposed grain elevator at Carvel is hardly likely to be built this year.

Several local men who have spent the summer working for elevator construction companies have sent back word that the prospects for more work along this line are poor, as the companies have decided to close down work on a number of the proposed elevators owing to the uncertainty prevailing at the present time as to the taking over of the present elevators by the Wheat Pool Council.

Every Rose Has Its Thorn.

To the harvest hand of 1923 life would be a good deal more pleasant if the grain wasn't so badly tangled that a man can hardly tell which end of the sheaf ought to go up, says the Bulletin. Anybody who has doubts about the crop being heavy has only to consult the chap who is doing the stacking, and his testimony will be corroborated by the one who rifles the binder. In most districts the grain was so heavy that it simply could not stand up, and a good part of the crop went down in a tangle like the politics of Europe. It is a crop that has been desperately hard to handle, and correspondingly costly. Still, farmers have not been heard saying that they would rather have had one of those easily handled crops such as they reaped in several preceding years.

FOR SALE—Small Heater, with quantity of pipe, suitable for living room; a bargain for somebody. C. E. Clarke, box 107.

Here and There

Protection of migratory birds has been added to the duties of the Canadian Pacific Railway's constabulary.

Airplanes attached to the Ontario Forestry Department are now equipped with radio sending apparatus so that they can keep in constant touch with the chief and other rangers.

There was an increase of sixty-three per cent in the number of immigrants to Canada during the last three months as compared with the corresponding period of last year.

Canadian Pacific agents in Britain recruited nearly five thousand men for work in the harvest fields of Western Canada and, through lack of steamship accommodation, closed their doors on as many more who, attracted by the special harvest rate, sought to enter Canada.

The branch lines program of the Canadian Pacific Railway carried out this year will bring into operation on the main line a larger number than any one year since 1914. Of the 431 miles of line under construction, 281 miles will be ready for handling grain in the Fall, and of the balance, 115 miles will be ready for use by the winter freeze-up.

A building has been acquired by the University of Toronto to be entirely devoted to the manufacture of insulin. This will be the only factory Canada to manufacture the curative fluid in commercial quantities and although it is manufactured in the United States, Great Britain and Denmark, the Canadian product will be sold throughout the world.

Dawson City recently celebrated the twenty-seventh anniversary of the discovery of the Klondyke. In an exhibition of Yukon products, cabbages 16 inches in diameter and weighing thirty pounds, potatoes as big as a man's head, pumpkins as big as watermelons, wheat, oats and barley bore witness to the fertility of the Yukon soil. Also on display were these ranged gold nuggets, gold dust and silver bars.

Dr. James Inches, Commissioner of Police, Detroit, and a guest at the Canadian Pacific Bungalow Camp at Nipigon, holds the record for the biggest speckled trout caught in the Nipigon River this season. He had captured a fish weighing 7 1/2 pounds. This catch was above the average, but a large number of big specimens have been taken from the Nipigon this season. Several years ago, and from practically the same place, Dr. J. W. Cook, of Fort William, caught the world's record speckled trout, which weighed fourteen and one-half pounds, and was more than two and a half feet long.

A record was established recently when one of the latest type of Canadian Pacific locomotives drew a train of 42 cars of newspaper, weighing more than 1,100 tons, from the plant of the Alberta Pulp and Paper Company, North Bay, to Toronto, without mishap. Ordinarily, it would have taken two passenger engines to haul such a load for the 320 miles. After proving its worth by this feat, the huge engine, together with an all steel train consisting of the latest model tourist, dining and sleeping cars, and a baggage and compartment car, formed part of the Canadian Pacific exhibit at the National Exhibition at Toronto.
